## The Project

The aim of the project is to create open digital educational resources in the field of palliative medicine based on developing innovative guidelines on standardized fundamental medical protocols and clinical language and communication skills for supporting the learning/teaching processes of the medical lecturers, of the language teachers who teach medical students, of medical students, and of the lay people involved in causalities.

## Main Project Products (outputs)

- Specialized research of medical literature and practice about palliative care
- Guide of operational procedures on palliative medicine
- Video with simulations on palliative care procedures
- Medical communication linguistic resources  
2 types of open online courses
  - Course on palliative care operational procedures
  - Language course for the medical field
- Trainer's Transversal Kit – palliative and linguistic fields

## Target Group

Project addresses to the following target groups:

- Lecturers & students in medicine
- (Foreign) in-service medical staff
- Social assistants or other staff dealing with palliative care (hospitals/hospices/homecare)
- Language teachers/trainers in medical institutions
- Educational centres
- Companies active in social corporate responsibility
